DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner has determined that the applicant is correct in regards to the non-obviousness of the current combination.
3. Claims 1 and 7 regard a method and apparatus for a multi-level loopback test in an community network system by communicating with Ethernet switches and a central office. The test itself involves at least two levels of BPDU creation and modification in order to determine connection failures, wherein the two tests are specific and detailed within the independent claims.
4. The combination of multi-level loopback testing, test packet generation, modification, and reply, and the environment of Ethernet control circuits, Ethernet switches, central office, and community network system in the manner detailed by the independent claims has not been taught by the discovered prior art, nor has there been taught sufficient motivation to combine the features. The combination is therefore novel and non-obvious.
5. All other claims are dependent on the allowable independent claims, and are therefore allowable for the reasons above.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2145

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard background teachings on loopback tests and community/Ethernet networks.
